

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: March 12, 2003/1:00 pm

Site Contact(s): Karen Wiemelt/Duane Parsons

Phone: 303-966-9883/303-966-6458

Regulatory Contact: David Kruchek

Phone: 303-692-3328

Agency: CDPHE

Purpose of Contact: 991 Tunnel Utility Disconnects/PREs for 215A, 331F & 331S

Discussion

The purpose of the discussion was to request approval to conduct utility disconnects at the 991 Tunnel (996, 997, & 999) and B985 prior to approval of the Reconnaissance Level Characterization Report (RLCR). The ventilation will be temporarily shut down to allow surveys within the ductwork and then re-started to ventilate the tunnel to remove radon. The electrical power, alarms and water utilities will be permanently disconnected in the 991 Tunnel and 985. Mr. Kruchek agreed to allow completion of these disconnects prior to RLCR approval.

Additionally, Tank 215A (the water tower), 331F and 331S characterization requirements were discussed. The water tower is supplied with water from the water treatment plant. The water is then distributed to the Site for drinking water, fire suppression, and other uses. Mr. Kruchek agreed the water tower was equipment and not likely to be contaminated; therefore the PRE process is acceptable for this tank.

Duane Parsons and Mr. Kruchek walked down 331F and 331S. Based on the walkdown, Mr. Kruchek agreed that the PRE process is acceptable for 331S. However, since there was some oil-like containers inside 331F and some oil-like spills on the floor, K-H needs to provide information on the history of 331F before he gives permission for the PRE process.
